PILATES FACTORY

Quality is our business plan

We are a young, dynamic business of professionals brought together by the love for Pilates.

Our firsthand knowledge of the benefits of this discipline to body and mind has led us to design and manufacture high quality and affordable equipment, with a desire and commitment to give back some of the achieved results.

OUR PHILOSOPHY

Italian skilled craftsmanship
Materials chosen with great care
and utmost attention to detail

FIRSTHAND EXPERIENCE

Our products incorporate
our knowledge and awareness
of Pilates

TECHNICAL SUPPORT AND PRE AND POST-SALES ASSISTANCE

Our customers represent our pride
and motivation. This is why we take
great care in listening to them.

REFORMER STUDIO

Features:

The structure of the Reformer is in laminated wood. This feature provides the wood with better resistance to mechanical stress and changes in temperature or varying environmental conditions. The sliding carriage is made of solid, multilayer birchwood on an aluminum frame. The sliding system runs on eight wheels fitted onto sixteen high flow ball bearings which reduce friction allowing a smooth and silent movement.

The distance between carriage and footbar is adjustable to 5 different positions thanks to a patented technology. This system ensures optimal use of the Reformer to people of all heights and also to those who have limited mobility of the joints.

The footbar is adjustable to four different angles and equipped with safety locks to keep it in the chosen position. There is an easily adjustable three-position headrest. Nickel-plated carbon steel springs of the highest quality assure resilience, strength and durability.

The padding of the seating, the headrest and the shoulder blocks is made of a mixture of neoprene and high-density foam which together provide maximum comfort while performing any type of exercise. The coating is anti-allergic, eco-friendly and non-slip. The metal frame of the Reformer is made of anodized aluminium and powder-coated steel. The straps are adjustable in height.

Product details:

HEIGHT: 36 cm
WIDTH: 61 cm
LENGTH: 229 cm

- Sitting box included in the price

- board available upon request

CADILLAC

Features:

The Cadillac frame is made of solid maple wood with an upper canopy of round stainless steel tubes with aluminium alloy connectors.

It is extremely versatile, suitable for a wide range of static, isometric and dynamic exercises. Very useful in physiotherapy, especially in the early stages of treatment.

The seating is upholstered in antiallergic vinyl and padded with neoprene and high density foam.

Product details:

HEIGHT: 220 cm
WIDTH: 205 cm
LENGTH: 75 cm

COMBO CADILLAC/REFORMER

Features:

Built in the same laminated birch wood frame of our Reformers, it allows to perform a wide range of exercises, combining the complete approach of dynamic movements of the Reformer with the isometric exercises essential for rehabilitation which are specific of the Cadillac.

It represents the best space-efficient option in small studios. Quick transformation without removing the carriage.

Supporting structure in aluminium and steel, upper frame in stainless steel.

Distance between the carriage and the footbar adjustable to 5 positions to better fit the user's size and height. Adjustable footbar and headrest.

BASIC EQUIPMENT OF THE COMBO CADILLAC REFORMER

- 1 Box with handles
- 2 mats
- 5 Reformer springs
- 4 long springs and 6 short springs of different resistances
- 2 rigid handles and 2 soft handles
- 1 Push-through bar
- 1 row bar
- 1 roll bar
- 1 Footstrap with carabiners
- 1 safety strap with carabiners
- 2 Fuzzy handles

Product details:

HEIGHT: 235 cm

WIDTH: 79 cm

LENGTH: 219 cm

WALL UNIT

Features:

Made in multilayered birchwood, its compact and reduced dimensions make it suitable for environments where space saving is essential, allowing nonetheless a wide and challenging range of exercises.

It comes with:

- 2 pairs of springs of different lengths and resistances
- 2 pairs of cotton handles
- 1 rowbar
- 1 birch pole fixed to the bottom part of the wall unit
- 1 push-through bar (optional upon request) which adjusts rapidly to 3 heights

Product details:

HEIGHT: 187 cm
WIDTH: 69.5 cm

PILATES

COMBO CHAIR

Features:

Handmade with high quality materials by Italian artisans.

Laminated birchwood frame, antiallergic vinyl cover.

Chair handles in stainless steel adjustable in height to three different positions and detachable. Handles feature an anti-slip sponge grip.

Four springs in two different strength resistances. Adjustable to 20 different positions. The foot pedals can operate both independently or jointly in parallel.

- Simple and quick spring tension changes (key element for switching smoothly and quickly from one exercise to another)
- Start distance between pedals and seating is always the same, regardless of the spring resistance setting.
- Possibility of adjusting the forementioned distance in relation to the exercises and to cater for the needs of students with functional limitations such as hip prosthesis or post-surgical knee treatment.

Product details:

HEIGHT: 65 cm
WIDTH: 53 cm
LENGTH: 72 cm

CHAIR AIR

Features:

- Compact and lightweight, easy to move and store in limited spaces.
- Modern version of the original Chair designed by Joseph Pilates.
- 2 springs of different resistances allow combinations of 24 different settings.
- The adjustment system is simple and easy-to-use, key feature for switching smoothly and quickly from one exercise to the next, especially in group lessons where the student himself changes resistances whilst sitting on the chair.
- The starting distance between the pedal and the seat of the chair is always the same whatever the spring resistance, but at the same time, it can be changed, by simply turning a knob, according to the types of exercises and to better cater for the needs of students of different heights or with functional joint limitations.

Product details:

HEIGHT: 63 cm
WIDTH: 53 cm
LENGTH: 76 cm

PED O PULL

Features:

Ideal for completing the set of your Pilates equipment, space-efficient and suitable for exercises performed in upright position, aimed at improving stability and functionality.

Product details:

HEIGHT: 210 cm

WIDTH OF THE BASE: 42 x 41 cm

SPINE WAVE / SPINE CORRECTOR

Features:

The Spine Wave patented by Pilates Factory is a Spine corrector, traditional in its form, but innovative in its functions. The tilting system which allows to vary the angle of the step, by lifting and lowering it, adds extensively to its functionality making it a complete tool, easy to use by both trainer and student.

It is devised with the possibility of separating the Step from the Barrel in order to give 2 different types of support, improving it even further.

The Spine Wave is a functional and complete piece of equipment, perfect for both studio work and group classes, where every student will easily find the ideal practicing position. It offers the opportunity of creating specifically aimed exercises for improving posture and fitness.

The materials used guarantee solidity and stability of the Spine Wave. This ensures safety also when performing exercises in upright position.

The padded coating has a degree of softness which provides support and extreme comfort.

Product details:

HEIGHT: 35 cm

WIDTH: 44 cm

LENGTH: 75 cm

LADDER BARREL

Features:

Developed following Joseph Pilates' original technical specifications, with particular attention to the size and shape of the ladder rungs and the curvature of the barrel.

The sliding base is adjustable in order to accommodate different torso sizes and leg lengths (+/- 30 cm)

Exceptional comfort thanks to the double foam padding, particularly appreciated in prone exercises such as Swan Dive or side-lying exercises like Side Sit Up or Mermaid. Handmade by Italian craftsmen with high quality materials. Frame made of birch wood.

Product details:

HEIGHT: 90 cm

WIDTH: 60 cm

LENGTH: 95/120 cm
